

Austin Engle

Maiden, NC | (704) 998-8799 | engleau@gmail.com | linkedin.com/in/dev-engle

Professional Summary

Enthusiastic Full-Stack Software Engineer with 6+ years crafting web and mobile experiences that delight users and drive business growth. Comfortable owning every step—from Figma prototypes through production deployment—using React, TypeScript, Node.js, Material-UI, and serverless/Firebase backends. A natural collaborator and Scrum Master, I pair a keen eye for UX with clean, maintainable code and responsive, accessible interfaces.

Work Experience

Freelance Software Engineer · Remote (NC) · 01/2021 – Present

- Partner with small businesses to define requirements, design in Figma, and build custom React & WordPress sites.
- Implement headless CMS solutions (WordPress, Contentful) so non-technical clients can update content seamlessly.
- Architect back-end services in Node.js and Firebase, ensuring reliable hosting and 24/7 uptime.
- Mentor junior developers through code reviews, pair programming, and hands-on workshops.

Full-Stack Software Engineer · IBG Software, Charlotte, NC · 11/2022 – 01/2024

- Led the rewrite of a WordPress academy site into a React/Next.js SPA, improving load times and mobile layouts.
- Built a library of reusable TypeScript + MUI components that accelerated new feature rollout across multiple products.
- Facilitated sprint planning, stand-ups, and retrospectives as Scrum Master—enabling biweekly releases with zero critical incidents.

Front-End Developer · Netmaker · Remote · 04/2022 – 11/2022

- Developed interactive, real-time dashboards in Angular.js and SASS, delighting customers with live network metrics.
- Automated CI/CD pipelines using Docker and GitHub Actions, cutting release cycles from days to minutes.

Technical Recruiter (Contract) · KForce · Remote · 03/2022 – 04/2022

- Sourced and screened front-end and full-stack developers using AI-powered tools and structured technical screens.
- Managed candidate pipelines for Fortune-500 clients, accelerating time-to-hire.

Tech Recruiter & Lead IT Technician · Proof LLC & Tranzact · Remote/Charlotte · 06/2020 – 11/2021

- Conducted full-cycle recruitment for clients like Apple and Macy's; created technical screens for React and JavaScript roles.
- Standardized desktop imaging and automated deployment scripts, reducing support ticket volume and setup time.

Selected Projects

- WaveBites Documentation Portal: Rebuilt Angular.js site in React, Contentful, and Material-UI; optimized asset delivery with Firebase.
- Engineered rich-text rendering with @contentful/rich-text-react-renderer and improved developer self-service.

Education & Certification

- B.S. Computer Science • Appalachian State University, Boone, NC
- Full-Stack Software Developer Certificate • UNCC Coding Bootcamp, Feb 2022
